

# INTERNATIONAL Convention on Colorants - 2023

2<sup>nd</sup> & 3<sup>rd</sup> March 2023, The Club, Andheri, Mumbai

Department of Speciality Chemicals Technology  
Institute of Chemical Technology

## 9th International Convention on Colorants (COC 23)

The 9th International Convention on Colorants (COC) will be held on 2nd and 3rd March 2023 at The Club, Andheri, Mumbai, India. This biennial event, organized jointly by Department of Speciality Chemicals Technology (*Formerly Department of Dyestuff Technology*), Institute of Chemical Technology and The Dyes & Pigments Manufacturers Association of India (*Formerly The Dyestuffs Manufacturers Association of India*), provides a platform to industry professionals, academicians, manufacturers and application specialists for exchanging knowledge, generating new ideas, identifying and solving problems, and discussing future trends and possibilities in the colorants field.

While the journey of the Indian colorants industry from import dependency to self-sufficiency was long and dreary, its transformation from a domestic player to a major exporter has been rapid and dramatic. That this paradigm change has happened despite increasing scrutiny and regulation, both national and international, is all the more commendable. Improvement in manufacturing processes and development of new products has played a major role in this achievement. However, colorants are finding new applications, customers are becoming more demanding and the society at large would like the industry to become 'sustainable'.

COC 23 will attempt to address all these issues by way of presentations from a select group of national and international speakers who are recognized experts in their chosen field. A poster session has been included, which will offer a platform to students for showcasing their research work.

More than 250 delegates are expected to attend this convention creating a very good opportunity to make new contacts and renew old ones. This convention will be immensely beneficial to entrepreneurs, marketing and manufacturing professionals, R&D scientists and university researchers.
